5. Key Qualifications: Economic analyst with extensive experience contributing to the design and evaluation of projects aimed at building the capacity of small farmers and their associations. Particular experience with the design and appraisal of agricultural and rural credit projects, whether as an economic consultant to the Principal Bank for Development and Agricultural Credit (PBDAC), or working with the International Fund for Agricultural Development (IFAD) in developing, monitoring and evaluating the credit components of projects in different Arab countries. Has extensive experience with all aspects of agricultural marketing, including the marketing of both inputs and outputs. Through his work on the Agricultural Extension and Marketing Assistance Project financed by the World Bank, he was involved in planning and coordinating the preparation of a project aimed at strengthening associations of small producers and connecting them with distributions centers. As a Marketing Specialist on the USAID-funded Agricultural Policy Reform Project (APRP), was involved in

developing marketing and pricing policies for cotton, rice, horticulture, and fertilizers, and developing market information systems and web sites to disseminate information on the Egyptian market worldwide. Has worked with a wide range of international organizations including USAID, GTZ, FAO, IFAD, WFP, ADF, ADB and the Arab Organization for Agricultural Development (AOAD). Designed and conducted a wide range of training courses in agricultural services, agricultural finance, and project analysis for Third World trainees through the Ministry of Agriculture.
